

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1 (Currently Amended): An electric connection box comprising:

a wiring board configured to have a first ~~having an~~ electric wire arranged on ~~both surfaces of~~ an obverse surface and configured to have a second electric wire arranged on a reverse surface;

an obverse cover arranged on the obverse surface of the wiring board ~~and having a~~ including a first connector cavity;

a reverse cover arranged on the reverse surface of the wiring board ~~and having a~~ including a second connector cavity; and

a press contact terminal ~~having~~ including:

a press contact edge portion configured to be pressed onto one of said first or second ~~the electric wire wires,~~ and

a tab portion erected in the first or second connector cavity,

wherein the press contact terminal is configured to press ~~presses~~ the press contact edge portion onto said one of said first or second ~~the electric wire wires~~ from a side where ~~the said one of said first or second~~ electric wire wires is arranged, thereby selectively erecting the ~~terminal portion~~ tab portion on at least one of said obverse surface or said reverse surface on ~~a surface having the electric wire arranged thereon and/or a surface opposite to the surface.~~

Claim 2 (Currently Amended): The electric connection box of claim 1, wherein ~~the press contact terminal presses the press contact edge portion onto the electric wire from a side where the electric wire is arranged, thereby erecting the terminal portion~~ the tab portion is

erected on each of said obverse surface and said reverse surface both of a surface having the electric wire arranged thereon and a surface opposite to the surface.

Claim 3 (Currently Amended): The electric connection box of claim 1, wherein ~~in the press contact terminal~~, the press contact edge portion is arranged at a right angle to the terminal tab portion.

Claim 4 (Currently Amended): The electric connection box of claim 1, wherein ~~terminal positions on the obverse surface and the reverse surface of the wiring board are set at the same position~~ said first connector cavity is arranged at a position relative to press contact terminals on said obverse surface, and said second connector cavity is arranged at a same position relative to press contact terminals on said reverse surface.
